

DRAWS AND DRAWSHEETS

There is no one correct way to update draw sheets/scoreboards. You need to do what makes the most sense for your tournament. The most important thing is that you make arrangements for your Hut Commanders to get the scores correctly, record them and then report the scores to either a "regional " or central location for Live Scoring and the Master Draw sheets/Scoreboard

Draw Sheets

- If your tournament is a National Ranking Tournament the draw will be done by the tournament Director and the Men's or Women's Ranking Committee. If it is a PCQ, consult your Region's President's Cup Captain for help with seeding.
- Once the draw is made you enter times, location and match numbers for the main draw and the back draws.
- If you are using Live Scoring please send the draw back to the APTA as soon as the times, locations, and match numbers have been entered.
- Make enough copies for each team, if not for each player. Make additional copies for each hut.
- If your budget permits have the draw sheets enlarged so that they can hang from the wall/window in each hut so that the players can see results.
